

New York State Center for School Health

Supporting Student Success Through Health and Education

Dear Colleague,

The NYSCSH is a technical resource office for the NYS Education Department. Since 1992, the Center has focused on providing assistance and resources to school nurses and school medical directors. In 2016, we broadened support to include school health educators and those who oversee health education.

Center resources include:

- Website with resources and tools at: www.schoolhealthny.com
- Phone and Email Support Monday – Friday. 7:30 am to 4:30 pm
- Health Information Portal (HIP) email subscription list www.schoolhealthny.com/hip
- Learning Management System (LMS) online learning at www.schoolhealthnylearn.com
- Professional Development Seminars
- Facebook Page www.facebook/nyscsh

We encourage you to visit our website to see all the resources available. Subscribe to our HIP email list to receive the most current and accurate information. Create an account in our LMS to access professional development opportunities and follow us on Facebook.

Please feel free to contact us by email or phone.

Sincerely,

The New York State Center for School Health – NYSCSH Staff
