From: Barbara Zittel, RN, Ph.D., Executive Secretary to the State Board for Nursing

Topic: Vagal Nerve Magnet Stimulators

Date: January 25, 2007

The State Board for Nursing has opined that the procedure of vagal nerve stimulation through use of a magnet is critical to the welfare of select children with seizure disorders. Unlicensed persons may apply this technique in school settings provided that such persons understand the particular child's seizure patterns and are trained in the proper technique and potential side effects.
